

PROJECT PROFILE

PELICAN AMINE TREATING PLANT

Client: MOMENTUM MIDSTREAM | Location: LOUISIANA

Opero Energy supplied a 1,900 GPM amine system and hot oil system for Momentum/DTE Midstream's Pelican treating facility in Louisiana. Opero Energy's scope of work included engineering the systems, designing skids for a modular installation, and in-house fabrication of the skids and equipment. Opero Energy also provided commissioning and startup support of the facility.

Project Overview

- 1,900 GPM Amine Unit
- Hot Oil System

Scope of Work

- Engineering & Design
- Fabrication
- Testing
- Commissioning Support
