

PROJECT PROFILE RAPTOR GAS PLANT

Client: TARGA RESOURCES | Location: WEST TEXAS

Opero Energy supplied a 200 MMSCFD GSP cryogenic plant to Targa Resources for the Raptor facility in West Texas. The project scope included a molecular sieve dehydration unit, GSP cryogenic plant with turbo expander, propane refrigeration, and hot oil system.

Project Overview

- 200 MMSCFD Cryogenic Plant
- 6,000 HP Refrigeration System
- Molecular Sieve Dehydration
- Hot Oil System

Scope of Work

- Engineering & Design
- Fabrication
- Testing
- Commissioning Support
