

# PROJECT PROFILE WILDCAT GAS PLANT

**Client: TARGA RESOURCES | Location: WEST TEXAS**

Opero Energy supplied a 200 MMSCFD GSP cryogenic plant for Targa Resources' Wildcat Cryogenic facility located in West Texas. Opero Energy's scope of work included engineering, designing, and fabricating the molecular sieve dehydration unit, GSP cryogenic plant with turbo expander, and propane refrigeration. Opero Energy also supplied a hot oil system and supported the testing, commissioning, and startup of the facility.

## Project Overview

- 200 MMSCFD Cryogenic Plant
- 6,000 HP Refrigeration System
- Molecular Sieve Dehydration Unit
- Hot Oil System

## Scope of Work

- Engineering & Design
- Fabrication & Testing
- Commissioning Support
