

# PROJECT PROFILE CLEMENS TERMINAL

**Client: PHILLIPS 66 | Location: TEXAS**

Opero Energy designed and fabricated six meter skids for the Phillips 66 Clemens Terminal expansion project. The project included engineering, design, fabrication, assembly, paint, instrument and electrical (I&E), and testing of the meter skids. Fabrication work included nondestructive evaluation, assembly and testing, I&E installation and wiring, pipe fabrication, and steel fabrication.

## Project Overview

- Six 4 inch meter skids
- 1,500 gpm
- Magnetic meter(s)

## Scope of Work

- Engineering & design
- Fabrication & testing
- Commissioning support
