

PROJECT PROFILE CARBON CAPTURE SYSTEM

Client: CONFIDENTIAL | Location: CALIFORNIA

OperoEnergy was awarded a clean energy project for a carbon capture and reduction program. We provided the engineering, design, procurement, and fabrication of the carbon capture modular unit. Utilizing Svante's proprietary CO2 capture technology, all equipment, piping, and valves were skid-designed for easy transport and installation. The scope also included commissioning the system.

Project Overview

- 10,000 tons/year of CO2 capture
- Svante technology
- Flue gas CO2 capture
- Modular facility

Scope of Work

- Engineering & design
- Fabrication
- Automation & testing
- Commissioning support
